

2017-02-15 Docker Sprint 2 Retrospective

Date 15 Feb 2017

Participants [Leigh Griffin](#) [Stephen Coady](#) [David Martin](#)

Retrospective

What did we do well?

- We performed a backlog review and set the priority for the remaining 3 sprints
- Progression of the sprint was excellent, good pace to it and good story pointing
- Comms was pretty good
- Smooth sprint, story points and tickets were well scoped
- Sprint Planning revisited the story points so very little surprises
- Team (Stephen) came to the Stakeholders (Dave & Leigh) with the plan for the next Sprint

What should we have done better?

- Sprint started at a bad time college wise, with other assignments due
- Not keeping in touch with the sprint day to day (Dave & Leigh)

Actions

- [Stephen Coady](#) to share wireframes as a mid sprint review asynchronously. Would recommend emailing that to us both.
- [Stephen Coady](#) metrics spike insight when you get to it (this sprint possibly)
